

FUTURE HARVEST CENTERS OF THE CGIAR

CIP is one of 15 food and environmental research centers located around the world that make up the Future Harvest Alliance. The Future Harvest Centers receive their principal funding through the Consultative Group on International Agricultural Research (CGIAR), a strategic global partnership of countries, international and regional organizations, and private foundations. Working with national agricultural research systems, the private sector and civil society, the CGIAR mobilizes agricultural science to reduce poverty, foster human well-being, promote agricultural growth, and protect the environment.

The Centers collaborate among themselves and with their diverse partners through numerous projects and system-wide programs. The CGIAR is also creating a series of independently governed partnerships among a wide range of institutions for high-impact research that targets complex issues of overwhelming global and/or regional significance. CIP has substantial participation in each of these Challenge Programs, and intends to extend this involvement to the Sub-Saharan Africa Challenge Program, currently being formulated. Over the past two years, three Challenge Programs have been established:

The Challenge Program on Water and Food creates research-based knowledge and methods for growing more food with less water.

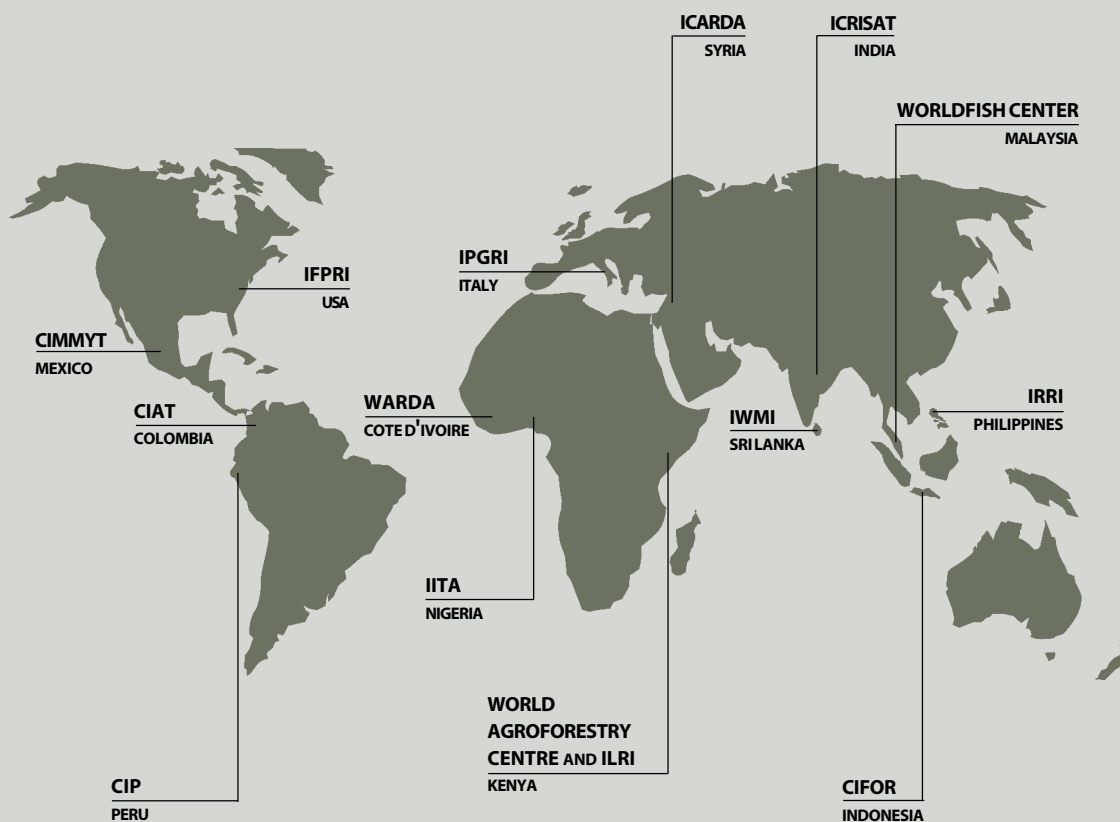

The HarvestPlus Challenge Program reduces micronutrient malnutrition by harnessing the powers of agriculture and nutrition research to breed nutrient-dense staple foods.

The Generation Challenge Program (Unlocking Genetic Diversity in Crops for the Resource-Poor) uses advances in molecular biology and harnesses the rich global stocks of crop genetic resources to create and provide a new generation of plants that meet the specific problems and needs of resource-poor people who rely on agriculture for subsistence and their livelihoods.

FUTURE HARVEST CENTERS

CIAT	Centro Internacional de Agricultura Tropical	IFPRI	International Food Policy Research Institute
CIFOR	Center for International Forestry Research	IITA	International Institute of Tropical Agriculture
CIMMYT	Centro Internacional de Mejoramiento de Maíz y Trigo	ILRI	International Livestock Research Institute
CIP	Centro Internacional de la Papa	IPGRI	International Plant Genetic Resources Institute
ICARDA	International Center for Agricultural Research in the Dry Areas	IRRI	International Rice Research Institute
ICRISAT	International Crops Research Institute for the Semi-Arid Tropics	IWMI	International Water Management Institute
		WARDA	West Africa Rice Development Association
			World Agroforestry Centre
			WorldFish Center
