

| Chapter/ section | Title <i>Contributors</i> | Page |
|-----------------------------|--|-------------|
| | An introduction to sweetpotato farmer field schools <i>G. Khisa, T. Stathers, S. Namanda</i> | 1 |
| | What is a farmer field school (FFS)? | 1 |
| | Objectives of the sweetpotato FFS training manual | 2 |
| | Starting of a FFS | 3 |
| | Preliminary community meetings | 3 |
| | Selecting participants | 3 |
| | Timing and frequency of the FFS meetings | 4 |
| | Identification of the location of the school | 4 |
| | Identification of activities the FFS might learn about | 4 |
| | Official opening of the FFS | 4 |
| | Facilitation and its role in the FFS process | 5 |
| | FFS activities | 7 |
| | Planning the season-long FFS | 7 |
| | A FFS session/ meeting | 7 |
| | • meeting initiation | |
| | • review of previous activities and briefing on day's activities | |
| | • agro-ecosystem analysis (AESA) | |
| | • group dynamic activity | |
| | • topics of the day and special topics | |
| | • review and evaluation of the days activities | |
| | Field days and exchange visits | 10 |
| | Evaluation of the FFS | 10 |
| | • evaluation of the results | |
| | • evaluation of process | |
| | • evaluation of impact | |
| | Farmers recommendations for future activities | 12 |
| | Closing/ certificates | 12 |
| | Follow up, post FFS | 12 |
| 1 | Sweetpotato in sub-Saharan Africa <i>R. Kapinga, S. Namanda, T. Stathers</i> | 13 |
| 1.1 | Sweetpotato within the livelihood system | 13 |
| 2 | Getting ready for sweetpotato production <i>R. Mwanga, P. Nampala</i> | 16 |
| 2.1 | Varieties | 16 |
| 2.1.1 | What to consider in variety selection | 16 |
| 2.2 | Planting material | 16 |
| 2.2.1 | Selection of healthy planting material | 16 |
| 2.2.2 | Dry season preservation of planting material | 17 |
| 2.2.3 | Rapid multiplication of planting material | 17 |
| 2.2.4 | Vine storage | 19 |
| 2.2.5 | Sources of planting material | 20 |
| 3 | Crop establishment and development <i>P. Nampala, P. Ndolo, R. Mwanga, T. Stathers</i> | 21 |
| 3.1 | The field and crop establishment | 21 |
| 3.1.1 | Location of sweetpotato fields | 21 |
| 3.1.2 | Cropping patterns | 21 |
| 3.1.3 | Land preparation | 21 |
| | • characteristics of a fertile soil | |
| | • how to maintain a fertile soil | |
| | • preparation of mounds or ridges | |
| 3.1.4 | Planting time, methods and plant density | 23 |

| | | |
|------------|---|-----------|
| 3.1.5 | Intercropping | 24 |
| 3.2 | Crop development | 24 |
| 3.2.1 | Growth stages of sweetpotato | 24 |
| 3.2.2 | Management at various stages | 25 |
| | <ul style="list-style-type: none"> • vine lifting • hilling up • weeding | |
| 3.3 | Plant nutrition | 27 |
| 3.3.1 | Nutrient needs of the sweetpotato crop | 27 |
| 3.3.2 | Deficiency symptoms (N, P and K deficiencies) | 28 |
| | <ul style="list-style-type: none"> • other nutrient deficiencies • water deficiency • nutrient toxicity • symptoms of virus infection | |
| 3.3.3 | Nutrient management | 29 |
| | <ul style="list-style-type: none"> • types of fertilisers and their composition • amount of nutrients needed by sweetpotato • time of nutrient application • sweetpotato fertilisation guidelines • nutrient needs of the sweetpotato crop • composting methods | |
| 4 | Pests, diseases and the agro-ecosystem <i>T. Stathers, R. Gibson, B. Odongo, R. Mwangi, D. Coyne, C. Riches</i> | 34 |
| 4.1 | Biodiversity and food webs | 34 |
| 4.2 | Life cycles | 36 |
| 4.2.1 | Insect life cycles | 36 |
| 4.2.2 | Lifecycles of fungi, bacteria and viruses | 38 |
| 4.3 | Natural enemies | 39 |
| 4.3.1 | Predators | 39 |
| 4.3.2 | Parasites | 39 |
| 4.3.3 | Pathogens | 39 |
| 4.3.4 | Common natural enemies in sweetpotato fields | 40 |
| 4.4 | Natural enemies and pesticides | 42 |
| 4.4.1 | What are pesticides? | 42 |
| 4.4.2 | Pesticides, natural enemies and pests | 42 |
| 4.4.3 | Pesticides and human health | 43 |
| 4.5 | Sweetpotato pests damaging roots in the field | 43 |
| 4.5.1 | Sweetpotato weevils (<i>Cylas puncticollis</i> and <i>Cylas brunneus</i>) | 44 |
| 4.5.2 | Rough weevil (<i>Blosyrus</i> sp.) | 48 |
| 4.5.3 | Termites | 49 |
| 4.5.4 | Millipedes | 50 |
| 4.5.5 | Vertebrate pests | 50 |
| 4.6 | Sweetpotato insect pests damaging leaves in the field | 51 |
| 4.6.1 | Sweetpotato butterfly (<i>Acraea acerata</i>) | 51 |
| 4.6.2 | Sweetpotato hornworm (<i>Agrius convolvuli</i>) | 52 |
| 4.6.3 | Tortoiseshell beetles (<i>Aspidomorpha</i> spp., <i>Lacoptera</i> spp. and others) | 52 |
| 4.6.4 | Armyworms (<i>Spodoptera exigua</i> and <i>Spodoptera eridania</i>) | 53 |
| 4.7 | Sweetpotato insect pests damaging foliage stems in the field | 54 |
| 4.7.1 | Clearwing moth (<i>Synanthedon</i> spp.) | 54 |
| 4.7.2 | Striped sweetpotato weevil (<i>Alcidodes dentipes</i> and <i>Alcidodes erroneus</i>) | 55 |
| 4.7.3 | Hairiness and eriophyid mites | 56 |
| 4.8 | Sweetpotato diseases in the field | 57 |
| | <ul style="list-style-type: none"> • Where do diseases come from? • Sweetpotato disease control | |
| 4.8.1 | Viruses | 60 |
| 4.8.2 | Fungal pathogens causing foliar diseases | 62 |
| | <ul style="list-style-type: none"> • Alternaria • Phomopsis leaf spot (<i>Phomopsis ipomoea-batatas</i>) | |

| | | |
|------------|--|-----------|
| 4.8.3 | Root rots | 63 |
| 4.8.4 | Nematodes | 64 |
| 4.9 | Weeds | 65 |
| 4.9.1 | Management of weeds <ul style="list-style-type: none"> • reducing weed seed survival and germination • mulching • crop rotation • intercropping • weeder geese • tillage • herbicides | 66 |
| 5 | Harvesting and post-harvest practices <i>T. Stathers, R. Kapinga, C. Owori, P. Nampala</i> | 70 |
| 5.1 | Harvesting | 70 |
| 5.1.1 | Determining the time of harvest | 70 |
| 5.1.2 | Harvesting methods | 70 |
| 5.1.3 | Assessment of yield and crop value | 71 |
| 5.1.4 | Packing and transporting of freshly harvested sweetpotato roots | 72 |
| 5.2 | Post-harvest storage | 72 |
| 5.3 | Fresh storage | 73 |
| 5.3.1 | Why store roots? | 73 |
| 5.3.2 | Problems of sweetpotato storage | 73 |
| 5.3.3 | Good storage techniques | 73 |
| 5.3.4 | Root selection | 74 |
| 5.3.5 | Storage structures for fresh sweetpotato roots | 74 |
| 5.3.6 | Pit storage | 74 |
| 5.3.7 | Clamp storage | 74 |
| 5.3.8 | Routine maintenance of pit and clamp stores | 75 |
| 5.3.9 | Subsequent seasons | 76 |
| 5.4 | Dry storage | 76 |
| 5.4.1 | Steps in processing quality dried chips and flour | 76 |
| 5.4.2 | Storage technologies <ul style="list-style-type: none"> • baskets • solid wall bins • metal storage bins • bag storage | 77 |
| 5.5 | Storage pest and disease management | 80 |
| 5.5.1 | Prevention <ul style="list-style-type: none"> • making sure that the product is in good condition for storage • keeping the store in good condition • practicing good storage hygiene | 80 |
| 5.5.2 | Monitoring | 81 |
| 5.5.3 | Management of storage insect pests in dried sweetpotato <ul style="list-style-type: none"> • parboiling • salting • sun-drying • re-drying • rolling and shaking • traditional protectants • insect proof containers • storage duration • varietal differences • hygiene | 81 |
| 5.5.4 | Management of pests and diseases in fresh sweetpotato storage | 84 |
| 6 | Sweetpotato processing and utilisation <i>S. Namanda, R. Nungo, C. Owori, T. Stathers, P. Kavana</i> | 85 |
| 6.1 | The nutritional value of sweetpotato | 85 |
| 6.1.1 | Sweetpotato as an energy source | 85 |
| 6.1.2 | Vitamins in sweetpotato | 85 |

| | | |
|------------|---|------------|
| 6.1.3 | Protein | 88 |
| 6.2 | Sweetpotato processing | 89 |
| 6.3 | Processed products of sweetpotato | 91 |
| 6.3.1 | Equipment | 92 |
| 6.3.2 | Favourite sweetpotato recipes | 92 |
| | <ul style="list-style-type: none"> • Sweetpotato porridge • Sweetpotato crisps • Sweetpotato chips • Sweetpotato 'Mshenye' • Sweetpotato relish • Sweetpotato mandazi • Sweetpotato chapatti • Sweetpotato doughnuts • Sweetpotato soya crackies • Sweetpotato onion bites • Sweetpotato strips • Sweetpotato bread • Sweetpotato buns • Sweetpotato cake • Tips on open-fire cooking • Sweetpotato biscuits • Sweetpotato pineapple upside down • Sweetpotato pie • Sweetpotato juice • Sweetpotato flours • Sweetpotato soap | |
| 6.4 | Sweetpotato as animal feed | 101 |
| 7 | Marketing <i>M. Freeman, J. Okoth, T. Stathers, S. Namanda, C. Olaunah</i> | 103 |
| 7.1 | The sweetpotato enterprise | 103 |
| 7.2 | The marketing process | 104 |
| 7.3 | The marketing environment | 105 |
| 7.4 | Understanding the market (Supply & Demand) | 105 |
| 7.5 | Marketing costs | 107 |
| 7.6 | Marketing margins | 108 |
| 7.7 | Examples of cost: benefit calculations for different activities of sweetpotato IPPM FFS | 109 |
| 8 | Farm management skills <i>E. van de Fliert, T. Stathers, M. Nabasiye</i> | 112 |
| 8.1 | Observing the crop and its environment <ul style="list-style-type: none"> • Why should we do routine observation? • Observation of the environment • Crop observation | 112 |
| 8.2 | Experimentation | 113 |
| 8.2.1 | Experimental design | 113 |
| 8.2.2 | Replication and randomisation | 115 |
| 8.2.3 | Field plot techniques <ul style="list-style-type: none"> • plot labels • size of plots • plot shape/ orientation | 116 |
| 8.2.4 | Data collection <ul style="list-style-type: none"> • reasons/ importance of data • measurements • recording • challenges in data collection | 117 |
| 8.2.5 | Evaluation <ul style="list-style-type: none"> • presentation of data • analysis of data • how to calculate an average | 118 |
| 8.3 | Field area measurement | 121 |

| | | |
|--------------|---|-------------|
| 8.3.1 | How to measure the field and calculate the area? | 121 |
| 8.4 | Economic analysis of the sweetpotato enterprise • Sweetpotato seasonal cultivation form | 122 |
| 9 | Sweetpotato IPPM FFS curriculum and ideas for learning activities <i>T. Stathers, S. Namanda, R. Gibson</i> | 125 |
| 9.1 | Example of a season long sweetpotato IPPM FFS curriculum developed by facilitators in North Eastern Uganda and Western Kenya | 126 |
| 9.2 | Blank season long sweetpotato IPPM FFS curriculum form | 132 |
| 9.3 | Ideas for learning activities | 136 |
| 9.3.1 | Variety selection | 136 |
| 9.3.2 | Experimentation | 137 |
| 9.3.3 | Sources of planting material | 140 |
| 9.3.4 | Healthy planting material and dry season preservation of planting material | 140 |
| 9.3.5 | Rapid multiplication technique | 141 |
| 9.3.6 | Soil fertility and plant nutrition | 142 |
| 9.3.7 | Crop development | 145 |
| 9.3.8 | Observing the crop and its environment, presenting and analysing the agro-ecosystem results | 145 |
| 9.3.9 | What is damaging my sweetpotato plant? | 147 |
| 9.3.10 | Do insect pests have natural enemies? What are they? | 149 |
| 9.3.11 | Defoliation | 151 |
| 9.3.12 | Sweetpotato diseases and how farmers manage them | 153 |
| 9.3.13 | Sources of disease infection | 154 |
| 9.3.14 | Could disease incidence be linked to where I plant my sweetpotato? | 155 |
| 9.3.15 | Sweetpotato virus disease | 155 |
| 9.3.16 | Weeds | 156 |
| 9.3.17 | When is a good time to harvest? | 156 |
| 9.3.18 | Bartering and yield | 157 |
| 9.3.19 | Why store sweetpotato roots? | 159 |
| 9.3.20 | A simple fresh storage technique | 159 |
| 9.3.21 | Stop eating my sweetpotato chips! | 160 |
| 9.3.22 | Adding value to the sweetpotato crop | 161 |
| 9.3.23 | Economic analysis of the sweetpotato enterprise | 161 |
| 9.3.24 | Sweetpotato cultivation record keeping | 162 |
| 10 | Group dynamics <i>S. Namanda, T. Stathers</i> | 163 |
| 10.1 | Wayward whispers | 163 |
| 10.2 | Counting 10 strides between stool and start position | 163 |
| 10.3 | Leading the blind | 164 |
| 10.4 | Collector's item | 164 |
| 10.5 | Follow me | 165 |
| 10.6 | Nine dots | 165 |
| 10.7 | How many squares? | 166 |
| 10.8 | Line up | 167 |
| 10.9 | Know yourself | 167 |
| 10.10 | Pull each other | 168 |
| 10.11 | Crashing plane | 168 |
| | Appendices <i>S. Namanda, T. Stathers, E van de Fliert</i> | i |
| 1 | Group evaluation of FFS process | i |
| 2 | Baseline interviews with FFS participants | iii |
| 3 | Individual interviews with either FFS or non-FFS farmers on sweetpotato production | xii |
| 4 | Training schedule for season _____ | xix |
| 5 | Individual interview guideline for traders and village officials | xxii |
